Computer Club Community Services

FTP Mirror (kernel.org, gnu.org, Linux/BSD distros, etc.) `ftp.club.cc.cmu.edu`
Usenet News Server `news.club.cc.cmu.edu`
Contrib www Server `www.contrib.andrew.cmu.edu`

Computer Club Member Services

Space on Club AFS server (can be an extension to your Andrew account)
Access to Drycas, the Club VMS/Vax Cluster, and other interesting systems
Retrocomputing systems, from PDP11 to 3B2 to PMAX to microvax to hp9000-300 to...

Computer Club Activities

Weekly open machine room hours
(Cyert B6, check `www.club.cc.cmu.edu` for date and time)
Spend your evenings refrigerated in the machine room
CMU Linux Users Group
Open Source development and advocacy
Programming Projects
Joint projects with CMU Robotics Club
Andrew Machine Room Tour

Fall Calendar

Early September - first meeting and barbecue - `0xdeadbef3 == 0xdeadbeef+4`
Regular films in Wean 7500
Talks & Presentations on subjects of interest

read `cmu.student.computer-club` *for dates and announcements*

Useful web sites

`www.club.cc.cmu.edu` - that's us.

`www.cmu.edu/computing` - the official CMU computing site

`www.cmu.edu/computing/documentation` - RTFM.

`www.cmu.edu/myandrew` - increase your quota and filter out your spam

`my.cmu.edu` - the official portal is another alternative to Mulberry for bboards

`www.cmu.edu/computing/education/networking` -
Unix, AFS, Pine info from CSW

`www.mit.edu/sipb/docs.html` - AFS, Kerberos, etc. documentation from MIT

Club free services

CGI scripts now supported on `www.contrib.andrew.cmu.edu` ...and no "publish" step!

`news.club.cc.cmu.edu` is a local NNTP server; use any newsreader

`ftp.club.cc.cmu.edu` and `www.club.cc.cmu.edu/pub` mirror the Linux kernel,
GNU software, and Knoppix

Using Zephyr

`zstart` *(on an Andrew Unix server)*

`zlocate userid`

`zwrite userid`

add names to `.anyone` then use: `znol -l`

get zephyrs on incoming mail: `zctl add mail \*`

Pine (in)essentials

From main menu, (S)etup then (C)onfig. Locate (use (W)here) and enable these:

`enable-aggregate-command-set`
Allows you to use select (;), zoom (Z), apply (A) commands to search your mail
and transfer or save it (but be careful not to delete it by mistake!)

`no-combined-folder-display`
You may prefer bboard navigation separately from your personal mail

`enable-full-header-cmd`

`enable-full-header-and-text`
Track down spam and viruses by seeing what's really in the message

If you subscribe to a lot of bboards or newsgroups (see below), you'll want to know that the
TAB key finds the next bboard with recently arrived messages.

Bboards to subscribe

`cmu.student.computer-club` - that's us.

`cmu.misc.market` - now with 50% more inane free!

`cmu.misc.market.computers` - like its parent, discussion as well as sales

`cmu.comp.os.linux` - more people use it than know about this board

`official.cmu-news` - all propaganda, all the time

`official.computing-news` - downtimes and other computing announcements
